

DANILO C. PELIN JR.

Frontend Developer

(+63)-928-378-2089 | danilopelinjr@gmail.com | [Github](#) | [Linkedin](#) | [Portfolio](#)

TECHNICAL SKILLS

Frontend: CSS, HTML5, JavaScript, Next.js, Node.js, NPM, React, TailwindCSS, TypeScript, & Vite.

Backend: Java, PHP, Postgresql, & Supabase

Tools/Frameworks: Adobe Photoshop, Canva, Figma, Inkscape, Postman API, & Visual Studio Code.

EXPERIENCE

STRASTAN SOLUTIONS CORP.

Guadalupe, Makati

AWS Cloud Fullstack Developer Intern

Feb 2026 – Jun 2026

- Developed custom and reusable UI components using React, TypeScript, and Tailwind CSS, leveraging shadcn/ui within a 5-person team to maintain a consistent, scalable interface.
- Integrated Next.js frontend with AWS Lambda backend services for the Promotions feature, validating API contracts with Postman to support a rollout across 10+ businesses.
- Authored 18+ Jest unit tests for AWS Lambda functions in a CDK-based media stack, mocking AWS SDK calls to validate backend behavior.
- Applied semantic HTML, accessible focus states, and responsive design when developing web interfaces.

PROJECTS

MONEY TRACKER ([Link](#))

Apr 2026 - Jun 2026

- Built a full-stack finance tracker in Next.js and TypeScript, featuring server-driven pagination and full-text search over transaction history.
- Designed reusable, type-safe UI patterns using discriminated unions for server action responses, reducing runtime errors across forms and data mutations.
- Implemented authentication with three identity providers via Supabase Auth, including optional multi-factor authentication (MFA) for enhanced security.
- Built a backup/restore system across five database tables using PapaParse and JSZip for CSV/ZIP conversion, with atomic imports handled via Postgres RPCs.

GLOBAL HOTSPOT TRACKER ([Link](#))

Aug 2026 - Sep 2026

- Built an interactive wildfire tracking map in Next.js/TypeScript/React using deck.gl, react-map-gl, and maplibre-gl, rendering real-time hotspot data with custom layer controls (Core and Data Overlay groups).
- Designed the application UX starting from Figma mockups through to a functional, data-dense map interface balancing usability with dense geospatial information.
- Consumed and visualized live satellite hotspot data (NASA FIRMS/VIIRS) alongside AQI, weather, and evacuation zone overlays, integrating with a custom backend search API supporting bbox/date/confidence filtering.
- Collaborated across the stack, pairing the React frontend with an ASP.NET Core backend to deliver a cohesive full-stack product

EXTRACURRICULAR ACTIVITIES

SIKAPTALA 2026: The National CS & IT Competition

Jun 2026

- Presented our thesis at SiKAPTala 2026: The National CS & IT Competition, competing against more than 12, multidisciplinary, 3-4 member teams, from universities across the Philippines and showcasing our research to a national audience.
- Placed 2nd Runner-Up in the Healthcare Track of the competition, competing against 3 other teams within the track.

EDUCATION

ADAMSON UNIVERSITY

Jul 2026

Bachelor of Science in Computer Science, Specialization in Web Science
Ermita, Manila
