EDUCATION

ADAMSON UNIVERSITY

Bachelor of Science

Major in Computer Science ; Concentration in Web Development

GWA: 1.38/1.00;

Relevant Coursework: Data Structure and Algorithms, Software Engineering 1 & 2, Object-oriented Programming, Artificial Intelligence, Discrete Structures 1 & 2, Algorithms and Complexity, Automata Theory and Formal Languages

Ermita, Manila

Jul 2026

EXPERIENCE

STRASTAN SOLUTIONS CORP. (5-member team, digital marketing and IT solutions company)

Guadalupe, Makati

AWS Cloud Fullstack Developer Intern

Feb 2026 – Jul 2026

- Implemented the backend integration between the AWS Lambda services and the Next.js frontend by wiring API endpoints within the Promotions feature using Postman API, enabling an upcoming functionality that could support more than 10 businesses.
- Developed custom and reusable UI components using React, TypeScript, and Tailwind CSS, utilizing shadcn/ui and native React components to create a consistent, maintainable interface within a team of 5.
- Authored 18+ jest unit tests for AWS Lambda functions in a CDK-based media stack backend, mocking AWS SDK Calls with an approximate passing rate of 90%.

PROJECTS

MONEY TRACKER ([Link](#))

Mar 2026

- Built a CRUD finance tracker web application using Next.js with Supabase to log and manage daily financial transactions.
- Implemented authentication using three identity providers within Supabase Auth with an optional multi-factor authentication (MFA) for enhanced application security.
- Utilized Supabase for database import/export, leveraging PapaParse and JSZip to convert JSON data to CSV, compress files into ZIP archives, RPCs, and handle reverse transformations.

EXTRACURRICULAR ACTIVITIES

SIKAPTALA 2026: The National CS & IT Competition

Jun 2026

- Presented our thesis at SiKAPTala 2026: The National CS & IT Competition, competing against more than 12, multidisciplinary, 3-4 member teams, from universities across the Philippines and showcasing our research to a national audience.
- Placed 2nd Runner-Up in the Healthcare Track of the competition, competing against 3 other teams within the track.

Transformative Link: A Semiconductor Knowledge Forum

Sep 2025

- Presented our Batak-English Mobile Translation Application at the university-wide semiconductor forum, attended by 17 industry partners from across the semiconductor industry.
- Demonstrated our project in front of 4 visiting experts and delegates from Mingshin University of Science and Technology and Taipei Economic and Cultural Office (TECO), together with 2 academic experts and industry leaders.

CERTIFICATIONS

- JavaScript Essentials 1 (Cisco) July 2026
- Introduction to Web Development (Meta) Jun 2026
- Information Technology Specialist in Cybersecurity (Pearson) May 2026
- Information Technology Specialist in Networking (Pearson) May 2025

SKILLS

Frontend: CSS, HTML5, JavaScript, Next.js, Node.js, NPM, React, shadcn/ui, TailwindCSS, TypeScript, & Vite

Backend: Supabase, PostgreSQL, Java, PHP, Python, PostgreSQL, & Postman API

Tools/Frameworks: Adobe Photoshop, Canva, Figma, Inkscape, Postman API, & Visual Studio Code
